Re: Item: 16191 & 16192

Dear Sir or Madam:

This Letter is being written to confirm that the following products:

Item No.	Description
16191	Koozie® Lagoon Lunch Cooler
16192	Koozie® Lagoon Dual Compartment Lunch Cooler

have an EPA registered antimicrobial agent incorporated into the plastic that protects the inner lining itself by suppressing growth of bacteria, algae, fungus, and mildew. The EPA master label states that the antimicrobial agent is approved for inclusion into storage containers and for indirect food contact uses, for protection of those materials themselves. Copies of EPA approved master labels for all registered antimicrobial agents are available online at <http://npirspublic.ceris.purdue.edu/ppis/default.aspx>. This product does not protect users or others from food-borne or disease-causing bacteria, viruses, or germs.

For more information on U.S. regulations on antimicrobial agents and treated products, visit <https://www.epa.gov/safepestcontrol/consumer-products-treated-pesticides>.

We have a current, passing, confidential test report on file with testing to ISO 22196-JIS Z 2801 and ASTM G21-15 standards.

If you have any questions please feel free to contact the undersigned.

Sincerely,

**FRANCINE DUPUIS**
