Re: Item: CSSTYANTI BIC® PrevaGuard™ Clic Stic® Stylus Pen

Dear Sir or Madam:

This Letter is being written to confirm that the following products:

Item No.	Description
CSSTYANTI	BIC® PrevaGuard™ Clic Stic® Stylus Pen

have an EPA registered antimicrobial agent incorporated into the plastic that protects the pen itself by suppressing growth of bacteria, algae, fungi, and mildew on its surface. The EPA master label states that the antimicrobial agent is approved for inclusion into writing instruments and input/output devices, for protection of those devices themselves. Copies of EPA approved master labels for all registered antimicrobial agents are available online at <http://npirpublic.ceris.purdue.edu/ppis/default.aspx>.

For more information on U.S. regulations on antimicrobial agents and treated products, visit <https://www.epa.gov/safepestcontrol/consumer-products-treated-pesticides>.

We have a current, passing, confidential test report on file with testing to JIS Z 2801:10 and ASTM G21-15.

If you have any questions please feel free to contact the undersigned.

Sincerely,

**FRANCINE DUPUIS**
